

Press Release

New COO assumes responsibility for Production, Quality and Supply at medac

Since May, Dr Christian Matschke has strengthened the Management Board of the medac Group as Chief Operating Officer (COO). His responsibilities focus on stable manufacturing and supply structures, high quality standards, and the reliable supply of pharmaceuticals and medical devices.

Wedel, Germany, June 4, 2026 - With the appointment of Dr Christian Matschke as Chief Operating Officer (COO), the medac Group adds further expertise to the management of its manufacturing, quality and supply processes. His areas of responsibility include Manufacturing, Quality, Supply Chain, Occupational Health & Safety, and cross-site operational processes.

The focus of his role is to ensure the safe, timely and high-quality supply of medicines and medical devices to patients and partners worldwide. At the same time, efficiency, productivity and the international competitiveness of medac's manufacturing and supply structures will continue to be strengthened

"A stable supply, efficient processes and high quality standards are essential to reliably provide patients worldwide with our therapies. Christian Matschke brings extensive experience in international manufacturing and supply organisations," says Frank Lucaßen, CEO of the medac Group.

Focus on efficiency, automation and collaboration

A key aspect of the COO role is the continuous improvement of processes and the further optimisation of the manufacturing network. This includes the increased use of new technologies, the automation of processes and close collaboration across all areas of the company

For Dr Matschke, the interaction between people, processes and technology is particularly important. Clear responsibilities, transparency and cross-functional collaboration form the foundation of a modern leadership culture

Experience in manufacturing and transformation

Dr Christian Matschke has many years of international experience leading pharmaceutical manufacturing, quality and supply organisations in regulated environments. His previous areas of focus include the development of global manufacturing networks, ensuring reliable supply, and building efficient cross-site structures and management teams. In addition, he brings extensive expertise in operational transformation and cross-functional collaboration.

With this appointment, medac continues to strengthen its manufacturing and supply capabilities and reinforces its commitment to the reliable provision of essential therapies worldwide.

About medac

At medac group, we believe that health is humanity's most valuable resource. Since 1970, our mission has been to improve patients' quality of life worldwide by making the best medical treatments available. As a globally operating pharmaceutical company headquartered in Germany, we provide high-quality medical treatments for patients worldwide in over 90 countries. With more than 2.000 employees we are committed to improving human health.

Our products are manufactured in Germany and other European countries to the highest standards, utilizing our own logistics center and production sites, and subsequently distributed worldwide.

We are constantly working to improve authorized medicines and to develop innovative therapies in the fields of rheumatology, urology, hematology, and oncology. Part of our mission is to provide safe, high-quality and innovative original products, as well as generics and biosimilars. In this way, we make vital treatments accessible to those affected.
